# NATIONAL INFODAYS

## IrRADIARE, Portugal

IrRADIARE, representing Community4Nature and the Natural Heritage Mission organized their National Info day in Cascais, Portugal on the context of Climate Alliance International Conference. This event was an excellent opportunity to share the mission's vision and goals, at the Learn and Share Marketplace, where different initiatives exchanged knowledge and experiences on environmental preservation and sustainability. Throughout the morning, we highlighted the importance of protecting natural heritage, strengthening community cooperation, and adopting innovative solutions that promote climate resilience. It was inspiring to be part of this global dialogue, contributing to the development of new partnerships and strategies aimed at addressing environmental and climate challenges collectively and effectively.

The National Info Day also served to bring together experts and community leaders, that are able to explore synergies and share best practices that can drive impactful action on both a local and global scale. The discussions and connections made during the event will help in future projects and initiatives, ensuring that the mission continues to play a crucial role in promoting sustainability and safeguarding our natural heritage for future generations. The National Info day also allowed to spread more awareness to the topics and planned events of the Mission both at national and european level.
