NATIONAL INFODAYS

CREAF, Spain

CREAF Solve the Challenge info day on Restoration was developed on October 17th and 18th during the International Congress on Innovation in Atmospheric Water Harvesting and Environmental Restoration Techniques promoted by LIFE NIEBLAS, in Las Palmas Gran Canaria

LIFE Nieblas offers innovative solutions to enhance forest restoration in the areas affected by desertification processes and wildfire. The water harvesting technique from fog can ensure better survival rates for plantations in remote areas.

We linked up with interesting restoration solutions and techniques, presenting the Mission for Natural Heritage opportunities for amplifying these solutions during the poster session and networking event.

Info

Date: 17/10/2024 - 18/10/2024

Location: International Congress on Innovation in Atmospheric Water Harvesting and Environmental Restoration Techniques, Gran Canaria
