

TREASURE

Testing novel environmental quality measures in and around Euro-MED ports

PROJECT TYPE
TEST

ENVIRONMENT
PORT AREAS

JAN 2024
SEP 2026

The project

The overall objective of TREASURE is to improve environmental quality in and around Mediterranean port areas, by mitigating and reducing sediment and water pollution. The project wants to address the fragile environmental quality of Mediterranean port areas, through:

cross-sector and cross-cutting **GOVERNANCE** frameworks to improve environmental quality in port areas

a common and advanced **MONITORING** framework, able to assess impact and pressures on port environments

commercialisation support and roll-out of **NOVEL TECHNIQUES** to remediate polluted sediments and water

Main outputs

A multi-stakeholder **governance solution** designed for the creation of territorial mini-labs.

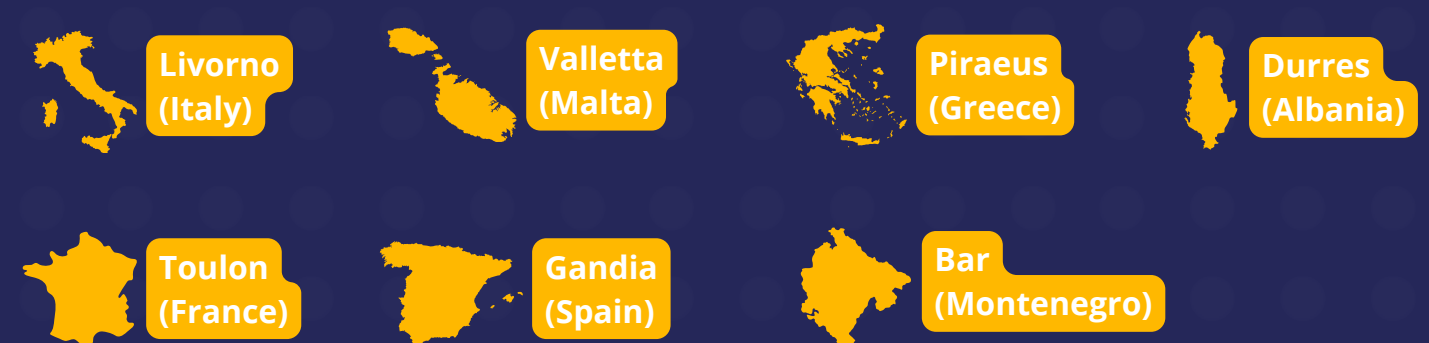

An integrated and innovative **monitoring approach** for the preservation and restoration of the land-sea ecosystem.

Tested **novel techniques** for the remediation of degraded and polluted port areas.

TREASURE launches 7 pilot initiatives to test at least 1 innovative solution in each of the participating port areas and selected by a dedicated call for proposals.

Pilots

Target groups

PUBLIC AUTHORITIES AT LOCAL, COUNCIL AND PROVINCIAL LEVELS

REGIONAL ENVIRONMENTAL AGENCIES

PORT AUTHORITIES

Natural heritage

Interreg Euro-MED
